Negros Occidental, Philippines

Available for web and systems development

ABOUT ME

Experienced software professional with a strong background in web development, enterprise systems, and business process tools. I build reliable applications using PHP ecosystems, modern JavaScript frameworks, CMS platforms, and database management, with hands-on experience leading and delivering modules for HR, payroll, inventory, finance, and portal systems.

CORE SKILLS

LANGUAGES

Visual Basic 6, Java, PHP, JavaScript, HTML, CSS

FRAMEWORKS

Laravel 9, Laravel, Vue.js, React.js, CodeIgniter HMVC, jQuery, WordPress, Magento

TOOLS

Git, GitHub, JCreator Pro, Microsoft Office, Adobe Photoshop, Dreamweaver

DATABASE MANAGEMENT

DBMS, database design, database administration, data maintenance, and relational database support

EDUCATION

Bachelor of Science in Information Technology

STI College Bacolod | 2007 - 2011

Bachelor of Science in Computer Engineering

University of Saint La Salle | 2004 - 2007

TRAINING

Laravel PHP Framework v12 Training

Nexova IT Solutions | May 14-17, 2025

Mustard Seed Payroll Pro Training

GC&C Group of Companies | January 1, 2019

RECOGNITION

Programmer of the Year | STI College Bacolod | 2008

Into Programming Competition 3rd Placer | 2011

Programming Panelist | STI Bacolod Education Center | 2012-2013

Coach, Into Programming Junior Division | Regional Champion and National Finalist | 2013

WORK EXPERIENCE

2018 - 2026

SENIOR PROGRAMMER

GC&C Group of Companies

Developed and maintained enterprise-grade business applications and internal process systems, contributing to payroll, asset, HR, access control, and organization-wide configuration modules, while managing GitHub repositories through branch creation, code updates, pull requests, and collaborative version control workflows.

2016 - 2018

SYSTEM DEVELOPER

Dime Data Corporation

Built tailored system solutions and helped deliver application modules for web portals, access control, business workflows, and internal automation, including GitHub repository maintenance, branch-based development, and pull request collaboration.

2015 - 2016

WEB DEVELOPER

Archmages Web Solution Inc.

Created and customized websites using WordPress, Magento, PHP, and front-end technologies, including functional enhancements and theming work for client brands, with hands-on experience creating repositories, updating branches, and preparing pull requests in GitHub-based workflows.

2013 - 2014

CUSTOMER SERVICE REPRESENTATIVE

Panasiatic Solutions Inc.

2011 - 2013

INFORMATION TECHNOLOGY INSTRUCTOR

STI Bacolod Education Center

SELECTED PORTFOLIO

ENTERPRISE SYSTEM

CodeIgniter HMVC Inventory System

Delivered an inventory-focused platform under a modular HMVC architecture with maintainable, business-oriented functionality, including database management support for inventory records, transactions, and system data integrity.

LARAVEL DEVELOPMENT

PIS - Personnel Information System

Developed a Laravel 9-based Personnel Information System with Vue 3 integration for smooth data rendering and a more responsive user interface, combining human resource information management, payroll processing, user account management, and core system configuration with structured database-backed workflows.

- Human Resource Information System
- Payroll System
- User Accounts Management
- Database Management

CORE SYSTEM CONFIGURATION

- Portal Modules
- Access Control Pages
- User Privileges
- User Roles

ATTENDANCE SYSTEM

CLOUDBAS - Cloud Biometric Attendance System

Built a cloud-based biometric attendance system using Node.js with Express and Laravel 9 with Jetstream and Inertia. The platform fetches attendance records from ZKTeco biometric devices, sends the data to a remote server for payroll processing, and includes employee and device management for updating records. It also provides real-time punch notifications to end users through a dedicated Telegram bot and SMS whenever they punch in and out on the device.

- Biometric Attendance Sync
- ZKTeco Device Integration
- Node.js and Express Development
- Laravel Jetstream and Inertia
- Remote Server Data Transfer
- Payroll Attendance Processing
- Employee and Device Management
- Telegram Bot Notifications
- SMS Notifications

WEB PORTAL

CodeIgniter HMVC Web Portal

Built and supported a modular employee and administration portal using CodeIgniter HMVC, covering HR operations, payroll, asset tracking, employee feedback, user account management, and DBMS-related database management for portal records and business process data.

- Human Resource Information System
- Payroll System
- Asset Management System
- Employee Feedback Form System
- User Accounts Management

ELECTRONIC FORMS SYSTEM

- Cash Advance
- Leave of Absence
- Overtime
- Travel Order
- Accountability
- Borrowing
- Return to Work

CORE SYSTEM CONFIGURATION

- Portal Modules
- Access Control Pages
- User Privileges
- User Roles

ERP

CodeIgniter HMVC ERP

Contributed to inventory and project management modules while coordinating with purchase, finance, accounting, system attributes, configuration areas, and related database management tasks.

CMS WORK

WordPress and Magento Development

Delivered theming and functional customization for client websites across WordPress and Magento platforms.

FEATURED SITES

WORDPRESS

Pinay.com

Functions and theming work.
